* Several of these patches are designed to take advantage of controllers (such as modulation, aftertouch, or an expression pedal).

* Refer to your instruments owner's manual for specific instructions on how to select and play Patches on the expansion board. On the JV-80/880 and JD-990, a "Load" of the Patches needs to be performed.

* On the JV-80/880/90/1000, you can not select the Patches which are designed to be used with JV-/1010/1080/2080 and XP series.

* On the JD-990, you can use Patches designed to be used with the JV-80/880/90/1000 if you "Convert Load" them first. However, such Patches will sound slightly different than they would if played on the JV-80/880/90/1000.
